## Activity 4: Where Oh Where Is the Mint?

Draw a line from each Mint city and description on the left to the state where the city is located.

The Philadelphia Mint started minting coins in 1792. Its coins are marked with a P.

The San Francisco Mint produces coins for collectors. Its coins are marked with a S.

The West Point Mint produces gold coins. Its coins are marked with a W.

The Denver mint started minting coins in 1906. Its coins have a D marked on them.

See if you can guess which state matches each of these descriptions below of natural and agricultural resources. Fill in each blank with the abbreviation for the state: AR (Arkansas), MO (Missouri), IN (Indiana), IL (Illinois), TN (Tennessee), MS (Mississippi) and KY (Kentucky).

- AR The nation's largest bauxite deposits were discovered in this state in the late 1890s.
- TN This state produces 5 percent of US cotton.
- MO Big Spring, in this state, puts out an average of 286 gallons of water daily.
