

COVID-19 and the “She-Cession”

Centering Women in Recovery Conversations

Ana Hernández Kent

Senior Researcher for the Center for Household Financial Stability at the Federal Reserve Bank of St. Louis

Prepared for Focus STL February 9 and 11, 2021

Wealth

What a family owns less what they owe

Education

Parents' Resources

Race/Ethnicity and Gender

Birth year

Overall Wealth Inequality

In 2019...

Demographic snapshot: Women

7% are millionaires (vs. 17% of men)

56% in bottom half of wealth distribution (vs. 44% of men)

~1/5 families (and ~half of Black families) with kids are headed by single moms

Source: Federal Reserve Board's Survey of Consumer Finances (2019) and Kent's calculations.

Note: Unit of analysis is families; characteristics are taken from the survey respondent, generally considered to be the most financially knowledgeable person.

Gender Wealth Gap

55 \$ \$ \$ \$ \$ \$ \$

Overall gap; female median wealth per \$100 of male survey respondent wealth

Never-Married: \$34 per \$100

Divorced, separated, or widowed: \$85 per \$100

Partnered: \$72 per \$100

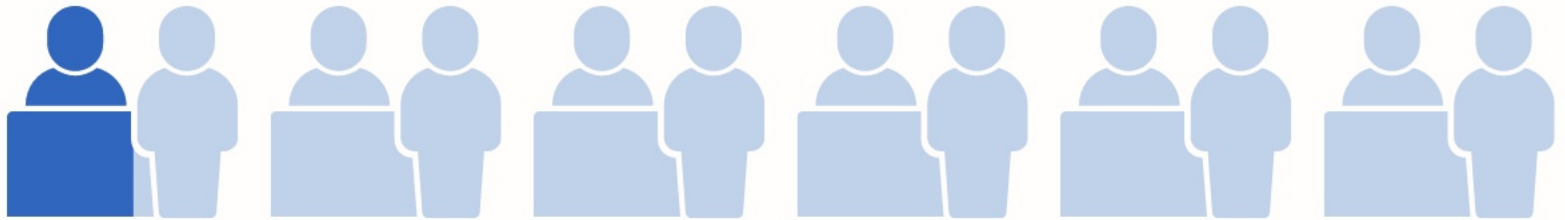

Married: \$63 per \$100

Sources: [Kent and Ricketts \(January 2021\)](#), using the Survey of Consumer Finances.

Asset Shares for Female-Headed Families

62% 

46% 

8% 

Source: Federal Reserve Board's Survey of Consumer Finances (2019) and Kent's calculations.

Icons represent home ownership, retirement savings in defined contribution accounts and business ownership. Men's values are 68%, 55%, and 15%, respectively.

COVID-19 Sparks a “She-Session”

Women: A Huge Force in 2019

- Majority of civilian non-farm workforce
- Earning advanced degrees and starting business at a higher rate than men
- More likely to be breadwinners than ever before

Upending Progress

Sources: Covington and Kent (2020), FRED, U.S. Bureau of Labor Statistics.

Not Just Job and Income Loss

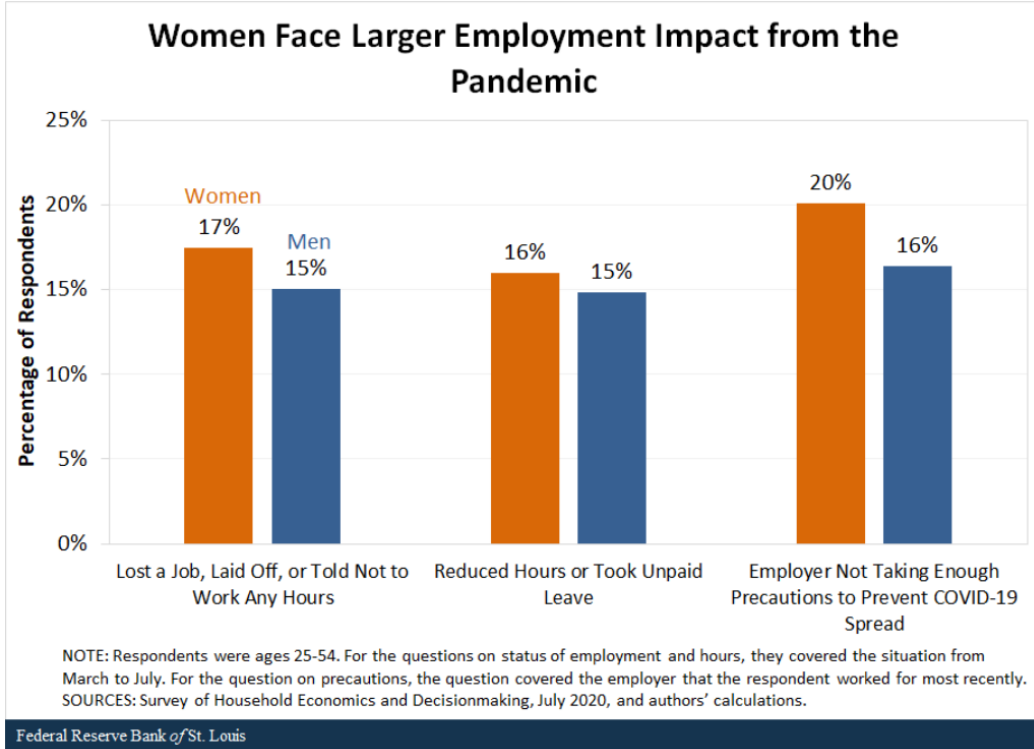

- **Hard-hit industries, April 2020**

Leisure and hospitality (39.3% unemployment rate)

"Other services" (e.g. personal and laundry services; 23.0)

Wholesale and retail trade (17.1)

Source: Kent's calculations using the U.S. Bureau of Labor Statistics, IPUMS-Current Population Survey.

Low-wealth groups are the same ones that have experienced disproportionate job loss.

Doing More with Less

Mothers were
4-5 times
more likely to
decrease
work hours.

Women provide
almost 70% of
child care
during standard
working hours.

Many financially vulnerable individuals are living with and/or providing for children or others outside their household.

How does your community compare?

St. Louis MSA Snapshot

Demographics

- 48% male
- 74% NH white
- Age: 39
- 34% (at least a bachelor's degree)

Finances

- \$82,100 (family income)
- \$29,800 (single female with children)
- \$172,700 (median house value)

Unemployment

- 5.9% as of December 2020
- (3.3% in February 2020)
- 9.7% male (Dec.)
- 5.8% female (Dec.)

Data sources: PolicyMap, Census, American Community Survey (5-year and 1-year estimates), HUD, and Kent's calculations. Note: Statistics are for the Fort Collins county subdivision of Larimer County.

Moving Forward

Center low-wealth groups, particularly women of color, in recovery efforts

Wealth gap: \$0.55 per every \$1 men's wealth

The most negative employment effect on those with fewest economic resources

Economic impact payments and Unemployment insurance have given temporary cash boost

Look beyond the "average" American and take wholistic approach
