he St. Louis Fed has a myriad of free resources to help teachers learn how to incorporate economics and personal finance into classes on just about any subject. Many of these are online courses, lesson plans, videos, podcasts, infographics, whiteboard activities, webinars and much more. In addition, there are in-person workshops and conferences. Materials are available for all levels. from pre-kindergarten to college.

## TOOLS **FOR TEACHERS**

Teachers can hear from many economists—including Fed Chair Janet Yellen.

Teacher conferences offer development credit.

Our Econ Ed Mobile Learning app focuses on inflation and the cost of credit—and has games, too!

professional PAGE ONE Economics The Productivity Puzzle

The Instructor Management Panel: the bridge between our resources and your classroom.

Page One Economics summarizes timely economic issues.

GLOSSARY Inflation Experiment Graph Challenge

## Challenge Game

Given the information below and your knowledge of inflation, your goal is to estimate the price of those same goods and services today.

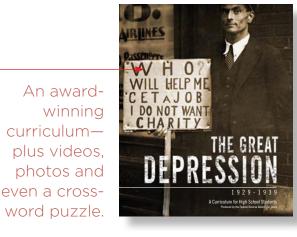

Total Accuracy: 59.5% 2 of 10

In 1961, I paid \$79.00. How much would I pay in 2012 for the same good/service?

\$0.00

BACK

Check Answer

Workshops and conferences are held throughout the year.
