“The New Neighbors’ [is an] excellent case study that explores how the dream of integration can become a reality and how residents themselves were able to fight sprawl and the decline of the first suburbs. This documentary is a powerful example of effective citizen action in addressing one of the more serious problems facing urban America.

“The New Neighbors’ is essential viewing for anyone who cares about the future of American communities. This important documentary details the role that stable racial integration plays in combating suburban decline and sprawl. The story of Pennsauken, New Jersey—masterfully told in ‘The New Neighbors’—serves as a national model for suburban renewal. Highly recommended.”
