

Our resources for learning about economics and personal finance include something for just about everyone—videos, podcasts, lesson plans, newsletters, online courses, infographics, in-person training and even old-fashioned flash-cards. These numbers scratch the surface on what was available and who was using what in 2016.

# BY THE NUMBERS

**1.1** million student enrollments in online courses and videos.

**107** videos with Q&A.

**6,483** educators reached through our programs.

**486,225** students who were reached by educators who attended our programs.

**167** lessons for classroom and other use.

**78** online learning modules.

**13.7** million pageviews of websites.

**442,468** downloads of resources.

All **50** states had students enrolled to use our online resources.

The Bank worked with **86 percent** of the **240** majority-minority, all-girls and/or urban high schools in the Eighth District to provide economic education content and resources.

**1,732** students who toured our museum on school field trips.
